

Not just the best equipment. The best equipment operators.

Repcon's Exchanger Specialty Division has been taking exchanger services to a whole new level of quality.

A large footprint. A large fleet. Repcon has one of the largest fleets of extractors in the nation, including arials, truck mounts, and self-propelled units. Our extractors are capable of pulling up to 220,000 pounds, and with our booster units, the capacity is even greater.

A specialty contractor with specialty equipment

Repcon owns and operates four truck-mounted extractors, two self-propelled extractors and nine aerial extractors.

Repcon's unique extractor mechanism is capable of transporting bundles inside the plant or unloading onto a trailer for subsequent transport. Of course, this process can also be reversed for installation of tube bundles.

Repcon's exchanger unit conforms to all U.S. safety standards and features the following safety devices:

- Emergency power-off switch both inside the cabin and remote
- 2 electric overload cutouts
- Spark arrestor
- All load-bearing cylinders are individually safeguarded against excessive pressure
- All load-bearing hydraulic cylinders have a line break safety mechanism
- Acoustic signal when driving in reverse
- Remote control has "dead man switch"

Being the best means being innovative

You simply can't have one without the other. Which is why we've taken more than three decades worth of exchanger equipment design and implementation and developed innovative specialty extractors capable of extracting tube bundles weighing up to 85 tons and measuring up to 36 feet in length.

"Our specialized managers and supervisors are knowledgeable, highly qualified, and respected throughout the industry."

OSHA Achievements

OSHA VPP Star Among Stars Region VI 2013

OSHA VPP Star Among Stars Region VII 2013

OSHA VPP Star Mobile Contractor Re-approval 2013

Count on REPCON for:

- **Extraction services**
 - Aerial extractors - thru 100" dia. x 33 ft. (length) x 55 tons
 - Truck-mount extractors - thru 23 ft. elevation
 - Self-propelled bundle extractor - designed to handle low elevation bundles.
- **Field repairs**
- **Shell repairs (ASME coded)**
- **Experienced personnel**
 - Highly trained supervision
 - Certified extractor operators
 - Skilled craftsmen
- **Late model equipment**

Blind-to-blind services

- Field exchanger repairs
- Shell repairs
- Bundle extraction, up to 120" or 170,000 lbs.
- Truck mount, self-propelled, and aerial extractors
